

**Product:** dry-chemical extinguisher,  
type: GP-6x ABC Plus

**Use :**

Dry-chemical extinguisher GP-6x ABC Plus is used mainly as a fire protection of workshops, warehouses, factory halls and underground mining headings, energetic and chemical plants. This extinguisher has very high extinguishing efficacy, is used to put out fires of solids, liquids, gases and electric equipment with the voltage up to 1000 V. Its “energetic” version as a result of approval from the Institute of Power Industry allows for using it to extinguish fires of electric al equipment with the voltage up to 123kV. This extinguisher extinguishes fires of A, B and C groups.

GENERAL TECHNICAL DATA	
Minimal extinguishing efficacy	55A 233B C
Mass of extinguishing medium	6 kg
Total mass	Approximety 9,6 kg
Kind of extinguishing medium	DELEI FIRE ABC extinguishing powder
Time of working	min. 15 s
Working pressure	16 bar In temperature of 20°C
Range of temperatures of use	-20°C up to 60°C
