

Product: **Dry-chemical extinguisher,
type: GP-6x ABC**

Use :

Dry-chemical extinguisher GP-6x is used mainly as a fire protection of workshops, warehouses, factory halls and underground mining headings, energetic and chemical plants. The extinguisher is used to put out fires of solids, liquids, gases and electric equipment with the voltage up to 1000 V. Its "energetic" version as a result of approval from the Institute of Power Industry allows for using it to extinguish fires of electrical equipment with the voltage up to 123kV.

GENERAL TECHNICAL DATA	
Minimal extinguishing efficacy	21A 113B C
Mass of extinguishing medium	6 kg
Total mass	approximately 9,6 kg
Kind of extinguishing medium	ABC DELEI FIRE extinguishing powder
Time of working	min. 12 seconds
Working pressure	16 bar in temperature of 20°C
Range of temperatures of use	-20°C up to 60°C
