

Product: **Carbon-dioxide extinguisher,
type: GS-5X-B**

Use :

Carbon-dioxide extinguisher is used mainly in industry, chemical laboratories, pharmaceutical warehouses, workshops, factory halls and warehouses of liquids and flammable gases as well as at petrol stations and in paint shops. The extinguisher is used to put out fires of liquids and flammable gases as well as electric equipment with the voltage up to 1000 V.

Its "energetic" version as a result of approval from the Institute of Power Industry allows for using it to extinguish fires of electrical equipment with the voltage up to 123kV.

GENERAL TECHNICAL DATA	
Minimal extinguishing efficacy	object 55 B
Mass of extinguishing medium	5 kg.
Total mass	approximately 14,7 kg.
Kind of extinguishing medium	carbon dioxide
Time of working	min. 9 seconds
Range of temperatures of use	-20°C up to 60°C
